NewLine

Category:	Display
Description:	Advances in the cursor down a line, and to the left

Inputs:

Registers:	None
Flags:	AppAutoScroll, (IY + appFlags) = 1 to scroll if next line is below bottom of window
Others:	(curRow) = current cursor row position

Outputs:

Registers:	None
Flags:	None
Others:	None
Registers destroyed:	None

Remarks: Be careful when using NewLine with appAutoScroll, (IY+appFlags) reset: If you're on the bottom row of the display, NewLine will move the cursor to a non-existant ninth row, which will cause display problems if cursor flash is enabled.

Example:
